During 1949, 70 new agricultural stations will be set up throughout the country, all of which will have more machinery, and machinery with greater capacity. In addition to tractors, the machine stations will have tractor-plows, drill plows for sowing, bean and pea threshing machines, sorters, grinders, motorcycles, trucks, etc.

For irrigation projects, 22,800,000 forints will be invested in comparison with 12,500,000 forints invested in the first quarter. This is in addition to approximately 3 million forints for the Danube-Tisza Canal project. Among the other investments are 29,900,000 forints for livestock development and improvement and 12 million forints for rural housing.

## TRACTOR PRODUCTION TRIPLED IN YEAR -- Szabad Nep, No 79, 31 Mar 49

The Hofherr Tractor Plant investment of 24 million forints will increase production capacity so that by the end of the year monthly production is expected to be 250-300 tractors. The large production increase is shown by comparing the 51 tractors completed in March 1948 with 160 tractors produced in March 1949. Production plans include the manufacture of four-cylinder Diesel-motor tractors. Work is already in progress on experimental models which are to be completed by 15 June.
